We offer our customers a wide range of technical service packages from a single source and develop tailor-made, sustainable and reliable solutions of the highest quality. With our experienced engineers, project managers and assembly teams, we implement projects across the entire life cycle.

In addition to our core business, building services engineering, Electra M&E offers a wide range of services in special areas such as test-bench technology, heating and cooling installations, ventilation and air conditioning, water supply and sewage systems and other technological & industrial installations.

Our services include:

-  Complete planning services
-  Technical consulting
-  Comprehensive project management
-  Complex engineering
-  Handling of official acceptance procedures
-  Service and maintenance
-  Training of technical customer personnel

We look forward to a successful collaboration on your next project. Send your request today to office@electra-me.de or call us: +49 89 7244999-10.
