15.01.2025, 19:37

We offer individual technical service packages from a single source. The customized services are always consistent with the specific project requirements. We implement projects over the entire life cycle with the help of our own experienced engineers, project managers and assembly teams.

Your claim to us:

- Complex engineering as part of plant construction
- Complete planning services
- Technical advice
- Complex project management
- Commissioning, handling of official acceptance procedures
- Service and maintenance services
- Training of technical customer staff
- We develop and implement modern, technical building services for industries and medium-sized businesses in a timely and cost-efficient manner
- EMED develops and realizes technically innovative projects and offers reliable services for the demanding customer, in harmony with people and the environment in an international atmosphere
- Our goal is to develop the leading technical service provider in the field of buildings and facilities, in order to provide customers (partners) with sustainable and reliable solutions of the highest quality
