Test Bench Technology

The specialist in test bench technology founded in 2014, con4 test solutions GmbH, has become the new location of Electra M&E Deutschland GmbH, on November 1, 2022, based in Braak, and is now part of the Electra family.

Since 2014, con4 test solutions has been active on the market as a recognized, specialized plant manufacturer in the field of test bench technology. Electra M&E has already been working very closely with con4 test since 2021. The close and successful cooperation is to be expanded and continued through the acquisition. The business area of con4 test complements the portfolio of Electra M&E in an optimal way and creates many synergies due to the same customer base. The business will be continued as a separate location within Electra M&E Deutschland.

-  Radiator test benches & air conditioning systems
-  Test benches for vehicle air conditioning systems
-  Coolant conditioning systems
-  Compressor test benches and refrigerant circuits
